

Consortium Rurality Percentage Compliance

According to [HCF Program rules](#), a consortium must be greater than 50% rural three years after the submission of the consortium's first FCC Form 462 (funding request form).

Applicants can view their percent rural status in My Portal under the "My Consortium" tab:

What happens after the three year mark?

- All consortia must be in compliance with program rules and more than 50% rural after the third anniversary of filing their first FCC Form 462.
 - For example, if a consortium filed their first FCC Form 462 on May 4, 2015, then the consortium would have to be more than 50% rural on May 4, 2018.
- If the rurality percentage is below 50%, the consortium will be considered out of compliance with program rules.

Methods to increase your rurality percentage

Add more rural sites

Add additional rural eligible HCPs to your consortium by selecting "File Member Form 460" from the My Consortium tab and uploading an appropriate [Letter of Agency \(LOA\)](#); once the FCC Form 460 and LOA are approved, you can add the site to your consortium:

Grandfathering of Non-Rural Sites

HCPs that were deemed rural prior to July 1, 2005, and received at least one funding commitment for services provided prior to July 1, 2005, are considered grandfathered rural and remain eligible. Grandfathered rural sites are treated as rural in the rurality percentage.
