

## Network Plan Checklist

A network plan is a narrative that describes specific elements of how the broadband network will be used to improve and provide healthcare delivery while leveraging existing technology and creating a cohesive network of healthcare providers.

Use the following checklist to ensure the applicant includes all required elements in the network plan.

## Network Plan Requirements

REQUIREMENT	WHAT IS IT?
<b>Goals &amp; Objectives</b>	<input type="checkbox"/> Address the goals and/or objectives of the consortium, how the requested services will be used, and/or why the consortium is competitively bidding for these services or planning to expand your network capabilities.
<b>Strategy for Aggregating Specific Needs of HCPs</b>	<input type="checkbox"/> Provide a description or strategy of how the consortium will aggregate the broadband network needs of the participating health care providers (HCPs) to create a cohesive network. <input type="checkbox"/> Indicate whether the consortium is regional, state-wide, or spans a group of states to ensure service providers bidding for services understand the network and its specific needs. <input type="checkbox"/> If the participating HCPs are located in rural or remote areas, describe the needs of these participants.
<b>Strategy for Leveraging Existing Technology</b>	<input type="checkbox"/> Provide a description of how the consortium plans to use an existing network to adopt a cost-effective means to connect to the service providers. <input type="checkbox"/> Provide a description of the consortium's existing network and how the current network will be used to supplement the needs of the consortium and ensure a cost-effective strategy.
<b>Description of How Supported Network will be Used</b>	<input type="checkbox"/> Provide a brief description detailing the plan to use the broadband network to improve or provide healthcare delivery (or telemedicine) to the HCPs. For example, this section can include examples of medical documents, charts, or x-rays that are transmitted via Internet, or the plan regarding how the network will be used to video conference with physicians in remote clinics.
<b>Description of Previous Experience Developing &amp; Managing HIT Programs</b>	<input type="checkbox"/> Provide a brief description of any consortium staff experience with the delivery of healthcare information technology (HIT) or telemedicine programs. <input type="checkbox"/> Include a description of the current management team and their experience with developing and managing HIT and telemedicine programs. This will ensure that USAC and service providers understand the background and ability to manage the consortium's network expansion.
<b>Project Management Plan</b>	<input type="checkbox"/> Provide a brief description of the project's management structure or leadership as well as a work plan and a schedule for the work plan (including approximate dates for work to begin, installation dates, etc.), and the budget available to fund the remaining 35 percent of the total cost of the services. <input type="checkbox"/> The project's leadership and management structure should identify who will be working with the service provider to implement services as well as defining leadership roles within the consortium team.
